# Stainless Steel, Zinc, Galvanized And HDG Bolts Available

Carriage bolts feature a round, domed head and square neck, which is specifically designed to fasten metal or wood to timber. Their square neck ensures stability by preventing the bolt from spinning once it's been installed with a nut. We carry Grade 5 carriage bolts, which are made from quenched and tempered medium carbon steel, with a tensile strength of 120,000 psa, that are also compliant with SAE J429 strength and hardness requirements and ASME B18.5 dimensional requirements.

Delivery service can get the fasteners and steel you need in a hurry

The advertisement features a dark blue background with a grid pattern. On the right side, there is a hexagonal inset image showing a close-up of several silver carriage bolts. A play button icon is centered in the lower half of the ad. The text is arranged in a clean, professional layout, with the company name and logo at the top left, the main headline in the center, and contact information at the bottom right.

## Stainless Steel Carriage Bolts

We carry stainless steel carriage bolts, which are strong and resistant to corrosion. Because of this material's natural resistance, they will perform reliably in environments that are subject to moderate oxidation and corrosion, including most outdoor installations and structures. In addition to stainless steel carriage bolts, we offer hot dipped galvanized (HDG) and zinc finished carriage bolts.

## Why Source Carriage Bolts From BACO Enterprises?

You'll benefit from choosing Baco Enterprises as your source for carriage bolts for many reasons. We offer a full selection of fasteners that have been inspected for uniformity and thoroughly tested in-house, including flat head bolts, askew head bolts, and timber bolts, among many others. We're also pleased to extend competitive pricing to our customers thanks to our longtime relationship with leading domestic and international bolt manufacturers.
